Session.

During Tuesday's legislative session, we accepted \$600 million in federal dollars for education and teacher support, along with approving gubernational nominations, most of which are for non-paying positions on boards, agencies and authorities.

Additionally, a bailout of New York City OTB failed by a 29-21 vote. I am hoping there can be a long-term solution and not just a short-term solution and could do more than just 'bail out' the poor-performing New York City OTB operation.
