Joseph A. Griffo

Griffo Says That New Measure Will Fight Drug Abuse

JOSEPH A. GRIFFO June 12, 2012

| ISSUE: **CRIME, DRUGS**

Senate Passes "I-STOP" to Reduce Prescription Drug Abuse

(Albany) – State Senator Griffo (R-C-IP, Rome) said that the measure which passed both houses of the Legislature yesterday would make significant changes to the way prescription drugs are distributed and monitored in New York State.

The bill (Senate #7637) includes “real time” prescription tracking to provide more information to doctors and pharmacists, in an effort to prevent deaths from abuse and overdoses of prescription drugs, particularly painkillers.

“The outcry from this problem featured many voices speaking in unison over how serious a health and safety issue that prescription drug-abuse has become,” said Senator Griffo.

“Healthcare advocates, law enforcement, educators, policy makers and families of victims had come to grips with substance abuse that has its beginnings with a simple sheet of paper – a prescription script.”

The provisions of the legislation include:

- Creating a modernized and improved “real time” Prescription Monitoring Program (I-

STOP) that practitioners and pharmacists can securely and easily access, allowing them to view their patients' controlled substance histories;

- Requiring e-prescribing, making New York a national leader by being one of the first states to move from paper prescriptions to a system mandating electronic prescribing;
- Updating controlled substance schedules to align New York's Controlled Substances Act with Federal Law and changing the schedules for hydrocodone compounds and tramadol to reduce abuse;
- Enhancing the Prescription Pain Medication Awareness Program to educate the public and health care practitioners about the risks associated with prescribing and taking controlled substance pain medications; and
- Establishing a Safe Disposal Program to increase the options available to safely dispose of unused controlled substances and prevent people who abuse prescription painkillers from obtaining them from friends or relatives.

The abuse of prescription medicine has become the nation's fastest-growing drug problem according to the Office of National Drug Control Policy. According to the federal Centers for Disease Control and Prevention (CDC), nearly 15,000 people die every year of overdoses due to prescription painkillers. In 2010, 1 in 20 people in the United States over the age of 11 reported using prescription painkillers for nonmedical reasons in the past year.

The abuse of prescription drugs is a statewide problem. Nearly one year ago on June 19, 2011, David Laffer shot four and killed four people at a drug store in Medford, Suffolk County, as

he stole 11,000 prescription hydrocodone pills. Michael D. Israel, 20, of North Buffalo, killed himself on June 4, 2011 via a self-inflicted gunshot wound because of his addiction to prescription drugs. And last week, 100 people were arrested in a coordinated law enforcement sweep targeting illegal prescription drug use in New York City and Long Island.

Since the bill was introduced at the request of the Governor and State Attorney General, it is expected to be signed into law shortly.
