MediSked Celebrates Grand Opening

JOSEPH E. ROBACH December 4, 2012

| ISSUE: **ECONOMIC DEVELOPMENT, SMALL BUSINESS, JOBS & EMPLOYMENT**

This afternoon, I had the opportunity to speak at the grand opening ceremony for MediSked, LLC, located on University Avenue. MediSked, LLC was born out of a partnership between provider agency management and proven success with software engineering. The founders of MediSked started the company as a research innovation at RIT in Rochester, NY back in 2003. What started out as an exhaustive search for an existing agency management software solution specific for home and community based provider agencies, quickly turned into the creation of MediSked and its one of a kind software solution that manages the unique workflows and requirements of such agencies. With the collaboration of auditors, service

coordinators, and state and local regulatory minds, MediSked was built with a keen understanding of the demands on provider agencies from all angles – client care, employee management, service coordination, compliance, etc. For more information on the company, visit their website at www.medisked.com.
