

NEW YORK STATE SENATOR

Martin Malavé Dilan

Organ and Tissue Donations

MARTIN MALAVÉ DILAN January 17, 2014

More than 10,000 New Yorkers are on waiting lists as the need for organ donations far exceeds the supply. One person who donates organs (hearts, lungs, liver, kidneys, pancreas and intestines) can save up to eight lives, while a tissue donor (corneas, bone, skin, heart valves, tendons, veins, etc.) can improve 12 or more lives by restoring eyesight, helping fight infections in burn patients and preventing the loss of mobility and disability.

By enrolling in the Donate Life Registry, you are giving legal consent for the recovery of your organs, tissues and eyes for the purposes of transplantation and research at the time of your death.

There are a variety of ways to enroll in the New York State Donate Life Registry. To learn more, and where and how you can enroll visit at health.ny.gov.
