

NEW YORK STATE SENATOR

Terry Gipson

innovative sustainability projects in the Hudson Valley

TERRY GIPSON June 4, 2014

I joined my colleagues Asm. [Didi Barrett](#), [Representative Sean Patrick Maloney](#) and Mayor Matt Alexander to celebrate the recent innovative sustainability projects in the Village of Wappingers Falls. These infrastructure projects are the result of public and private partnerships, and federal, state and local governments working together. The Ecological Storm-water Wetland and Solar Facility are smart investments of federal and state grants that reduce the cost of living for residents, modernizes our local infrastructure and promotes economic growth.
