

NEW YORK STATE SENATOR

Terrence Murphy

NYSEG reports 99 percent restoration as Murphy tours substation fire

TERRENCE MURPHY May 27, 2016

LAKE SECOR, NY - When power went down this evening across northern Westchester, Putnam and Dutchess counties, Senator Terrence Murphy headed north to find answers. He toured the substation in Carmel where a fire had left tens of thousands without power and said the following:

q

"I've toured the Secor substation and met some great Utility Workers who were in the middle of restoring power. I'm happy to report that up to ninety-nine percent has been restored due to their expertise and hard work."

q

"I also spoke to the superiors at NYSEG who assured me we will work together to improve communications protocols with both my office and the public in the future."

q

"A special thanks to our Mahopac Falls Volunteer Fire Department for their swift action in putting out a fire that could have been a potential disaster. Job well done, great work."

The fire began around 9:30 pm and power was almost fully restored by 1:00 am.
