

## 2017-J1763

Senate Resolution No. 1763

BY: Senator STEWART-COUSINS

MEMORIALIZING Governor Andrew M. Cuomo to proclaim April 16-22, 2017, as Abusive Head Trauma/Shaken Baby Syndrome Awareness Week in the State of New York

WHEREAS, The most recent statistics compiled by the federal government estimate that 683,000 children were victims of abuse and neglect in the United States in 2015, of whom 24.1 percent were under one year of age; and

WHEREAS, That statistic includes 66,676 children in New York State, of whom 6,605 were under one year of age; and

WHEREAS, On an average day in the United States, at least four children will die as a consequence of abuse or neglect by a parent or other person entrusted with their care; and

WHEREAS, Children younger than one year of age accounted for 49.4 percent of all child abuse and neglect fatalities, and children four years of age or younger accounted for 85 percent of all child abuse and neglect fatalities, in 2015; and

WHEREAS, The leading cause of death of abused children under age five is Abusive Head Trauma, including the inflicted trauma known as

Shaken Baby Syndrome; and

WHEREAS, On average 1,200 to 1,400 children in the United States are diagnosed with AHT/SBS every year, and medical experts believe many additional cases are likely misdiagnosed or undetected; and

WHEREAS, Shaken Baby Syndrome and other inflicted head trauma occurs when a caregiver loses control and shakes a baby or young child, most frequently less than one year of age but in some cases as old as five years of age, resulting in loss of vision, brain damage, paralysis, seizures, or death; and

WHEREAS, Shaken Baby Syndrome often causes permanent, irreparable brain damage or death to an infant, and may result in more than \$1,000,000 in medical and rehabilitation costs for the care of a single disabled child during the first years of life; and

WHEREAS, A growing body of medical evidence indicates that even mild trauma to the brain caused by AHT/SBS is likely to cause learning disabilities in children and substantially increase the risk of future substance abuse; and

WHEREAS, The Centers for Disease Control and Prevention estimated in 2011 that the average cost of child maltreatment is \$210,012 over the course of a victim's lifetime, including the costs of child welfare, special education, criminal justice expenses, medical care and lost productivity as an adult; and

WHEREAS, It is estimated that the taxpayers of the State of New York may, through the State Medicaid program, pay as much as 41 percent of the medical and rehabilitation costs of inflicted head injuries; and

WHEREAS, The Centers for Disease Control estimates that child abuse costs our nation more than \$124 billion a year, and the cost of child abuse in New York State is estimated to exceed \$13 billion a year; and

WHEREAS, The most effective way to end AHT/SBS is by educating parents and caregivers about the danger of shaking children and providing the skills needed to cope with frustration and anger; the minimal costs of educational and preventative programs may avert enormous medical and disability costs and untold grief for many families; and

WHEREAS, Evidence-based education and awareness programs, such as the nationally recognized New York SBS Prevention Project, developed by Dr. Mark Dias with the support of the NYS Children and Families Trust Fund, and implemented in collaboration with Kaleida Health Women and Children's Hospital of Buffalo and the Maria Fareri Children's Hospital of Westchester, are shown to raise awareness and provide critically important information about SBS to parents, caregivers, daycare workers, and health care professionals; and

WHEREAS, The NYS Office of Children and Family Services has worked with the network of hospital education programs and advocates to build upon these initiatives by developing the statewide "Safe Babies New York" initiative ([www.safebabiesny.com](http://www.safebabiesny.com)) to educate new parents about coping skills that prevent inflicted injury, and promote safe sleep practices that reduce the risk of Sudden Infant Death Syndrome, thereby helping to ensure that the parents and families of the 237,000 babies born in New York State every year have the information they need to help keep their newborn child safe before they leave the hospital; and

WHEREAS, In 2015, the Safe Babies projects funded by OCFS delivered the Never Shake a Baby message to the parents of 198,392 newborns,

making that information available for 91 percent of all hospital births in New York State; and

WHEREAS, Home visiting programs, such as Healthy Families New York, the Nurse Family Partnership, and other programs for new parents show great promise for preventing maltreatment; and

WHEREAS, These prevention efforts are supported by national groups such as the American Academy of Pediatrics, Prevent Child Abuse America and the National Center for Shaken Baby Syndrome, as well as individuals and organizations in New York State, such as Prevent Child Abuse New York, the Cynthia Gibbs Foundation, and the SKIPPER Initiative, who work to educate new parents and caregivers, increase awareness among the general public and professionals, and encourage increased support for victims and their families in the health care and criminal justice systems; and

WHEREAS, The New York State Legislature has enacted legislation to help increase awareness of AHT/SBS by requiring that: hospitals offer written information about Shaken Baby Syndrome (2001); new child care providers be educated about the causes, consequences and prevention of SBS before they are licensed to care for children (2003); hospitals to

offer new parents the opportunity to watch a video about the causes, consequences and prevention of SBS so that they can help protect their child from shaking injuries (2004); the Health Department coordinated a statewide campaign to educate the public about the causes, consequences and prevention of SBS (2006); the Education Department provided a curriculum on SBS to schools so that students, who not only may be parents someday, but who may be babysitting for young children now, are educated about the importance of coping skills (2006); and

WHEREAS, This Legislative Body wishes to commend those advocates, organizations and agencies of State, county and local governments which continue these efforts to educate parents and caregivers about the causes, consequences and prevention of SBS and other inflicted injuries; and

WHEREAS, This Legislative Body particularly wishes to recognize the nurse educators who provide education to new parents at New York's maternity hospitals so that every new parent has the opportunity to learn how they can help protect their child from shaking injuries; now, therefore, be it

RESOLVED, That this Legislative Body pause in its deliberations to memorialize Governor Andrew M. Cuomo to proclaim April 16-22, 2017, as Abusive Head Trauma/Shaken Baby Syndrome Awareness Week in the State of New York; and be it further

RESOLVED, That a copy of this Resolution, suitably engrossed, be transmitted to The Honorable Andrew M. Cuomo, Governor of the State of New York.
