37. Solarize Your Community!

Solarize NYC is a core component of New York City's strategy to expand access to clean, reliable, and affordable solar power for all New Yorkers. Through One City: Built to Last, the City of New York funded the NYC Solar Partnership to continue its work to reduce market barriers for solar, attract more solar energy companies to the city, and increase the city's installed solar capacity.

In addition to supporting the City's goal of installing 250 MW of solar capacity on private property by 2025, Solarize NYC's mission is to reduce barriers for communities that have historically had limited access to solar by providing informational resources and offering discounted pricing. Further, Solarize NYC supports the local solar industry by stimulating demand for local installers and reducing customer acquisition costs by aggregating customers.
