ONEONTA, 04/13/20 – “On behalf of Senator and Mrs. Seward, I am glad to announce that the senator has been discharged from Albany Medical Center and is now continuing his recuperation from the COVID-19 virus at home.

"The family is profoundly grateful to God and the medical team at Albany Medical Center for the senator's recovery from the virus. The outpouring of prayers and well wishes from

neighbors, constituents, friends, legislative colleagues, local officials and others has encouraged, strengthened and cheered them through the recent challenging weeks. They consider themselves blessed by the love and concern that have been expressed for the health of both the senator and Mrs. Seward. Easter is about the truth of the Resurrection and this year we are more than ever mindful of its impact.

“Senator Seward is anticipating a full recovery and looking forward to resuming his duties on behalf of the people he feels privileged to represent.”
