Empire City Casino by MGM Resorts Partners with NY Blood Center in Response to Blood Shortage Emergency, Hosts Community Blood Drive on Monday, May 17

ANDREA STEWART-COUSINS May 10, 2021

| ISSUE: **EMERGENCY BLOOD SHORTAGE; EMPIRE CITY CASINO; BLOOD DRIVE**

(Yonkers, NY) – With local blood supplies at critically low levels in the New York region, **Empire City Casino by MGM Resorts (Empire City)** has partnered with the **New York Blood Center** (NYBC) to host a community blood drive on Monday, May 17, from 1:00 p.m. to 7:00 p.m. Blood donations are by appointment only and can be scheduled by calling 1-800-933-2566 or by visiting the New York Blood Center’s [website](#) to select a time slot and register.

As the region recovers from the ongoing pandemic, the blood drive provides an opportunity to raise awareness on the importance and need for regular blood donations, especially since many community blood drives were cancelled over the last year. NYBC currently only has a four-day supply of blood, which is well below what is needed by local area hospitals. New York’s healthcare system requires about 1,500 donations each day to treat patients ranging from trauma victims, newborn babies and their mothers, to cancer patients. Donors with type O and type B blood are especially needed as NYBC currently only has a one-to-two-day supply of these blood types.

“We felt it was imperative for us to do our part to help replenish the critically low blood levels and we are honored to support such an important cause,” said **Ed Domingo, MGM**

Resorts Northeast Group SVP and Chief Financial Officer.

Of the approximately 37 percent of the total U.S. population eligible to donate blood, less than 10 percent actually donate. Nationally, over 4.5 million Americans require a blood transfusion annually, with individuals needing blood every two seconds.

“The summer always presents a challenge to maintain blood inventories and the pandemic has made it even more unprecedented,” said **Andrea Cefarelli, Senior Executive Director of Recruitment & Marketing for NYBC.** “As New York bounces back, we ask all eligible donors to make an appointment to donate blood to help save lives. While the end of the pandemic is near, our struggle to fight for those in need continues. Please roll up your sleeves and donate,”

Anyone between the ages of 18 and 75, and weighing at least 110 pounds, is a potential donor. Those interested in donating **must schedule an appointment in advance** to comply with health and safety protocols in place. Prior to the blood donation appointment, on-site specialists will check blood pressure, temperature, iron levels and pulse of all donors to ensure individuals are healthy enough to donate. Interested individuals must be 14 days symptom free, if recovering from COVID-19, and vaccinated individuals are eligible to donate immediately.

Joining Empire City executives in support of the blood drive is New York State Senate Majority Leader Andrea Stewart-Cousins, whose late husband had been the recipient of numerous blood transfusions and who continues to encourage blood donations to honor his memory.

“I had already donated a gallon of blood over the years before my husband needed an extraordinary amount of blood following a serious operation,” said **Senate Majority Leader Andrea Stewart-Cousins**

. “To have blood available in his time of need made all the difference. That’s why I’m grateful to the New York Blood Center for tireless efforts during this pandemic, and I applaud Empire City for raising awareness about the need and value of donating blood.”

About New York Blood Center

Founded in 1964, New York Blood Center (NYBC) is a nonprofit organization that is one of the largest independent, community-based blood centers in the world. NYBC, along with its operating divisions Community Blood Center of Kansas City, Missouri (CBC), Innovative Blood Resources (IBR), Blood Bank of Delmarva (BBD), and Rhode Island Blood Center (RIBC), collect approximately 4,000 units of blood products each day and serve local communities of more than 75 million people in the Tri-State area (NY, NJ, CT), Mid Atlantic area (PA, DE, MD, VA), Missouri and Kansas, Minnesota, Nebraska, Rhode Island, and Southern New England. NYBC and its operating divisions also provide a wide array of transfusion-related medical services to over 500 hospitals nationally, including Comprehensive Cell Solutions, the National Center for Blood Group Genomics, the National Cord Blood Program, and the Lindsley F. Kimball Research Institute, which — among other milestones — developed a practical screening method

for hepatitis B as well as a safe, effective and affordable vaccine, and a patented solvent detergent plasma process innovating blood-purification technology worldwide.
