
DISMANTLING SYSTEMIC RACISM IN EDUCATION

*Opportunities To Succeed From Pre-k
To State University Of New York (SUNY)*

Deeply entrenched institutional racism, classism, and generational poverty continue to plague Black, Brown and low income communities across New York State. Access to a high quality education is still one of the most effective solutions to combat these obstacles and challenges. How can NYS step up to protect public education from the destructive education policies of Trump and DeVos? Now is the time to invest in the resources and programs our children need and deserve.
