

Make Every Day Earth Day

By Tommy Lane

Each day we can support our Earth in many different ways

We can protect our grounds, trees, and where each animal
stays

A clean up of beaches and our environment can be done by
everyone

We can throw all trash in the garbage when a snack or a meal is
done

We can plant and water more flowers and trees

Creating more for the bugs, the birds, and the bees

We can recycle plastics and cardboard too

Can you think about what else we should do?
