

# Think About Our Planet

By Liana Calabro

Our Lady of Good Counsel School

7th Grade

Next time you come to school with plastic forks, spoons, and knives

Take a moment and think about all the animals who lost their lives

About all the plastic in the ocean, on beaches, in our air

When you start to wonder, what can I do to care?

Cut down on plastic, as much as you can do

And by doing this, the environment will love you!

So next time you take the environment for granted,

Stop for a moment, and think about our planet.
