Care for Our Environment

Too much plastic in our waterways,
Are not good for the environments' airway.
The addiction to plastic has to stop,
So all waterways can be on top.

A way to help the earth, is to stop using plastic,
If we do this, our earth will look fantastic.
Use glass, steel, cotton, hard plastic, and more,
This will be an eco-friendly chore.

Earth is our home do not make it a waste,
For we do not want it to be erased.
We should care and respect this place where we stay,
For Earth is our big dome, a special walkway.

Earth, Earth, we will help you,
Everyone should treat you like a virtue.
You are more valuable than treasure,
And always give us pleasure.

Everyone can save the Earth in a way,
It is now our time to save the day.
Help now and don't wait,
Because then the Earth will be at its fate.
