

# What Am I Thankful for? Essay

By Nico Marucci

I am thankful for such a great family I have for getting me all the things I want but also helping me when I'm not in a good mood but teaching me new things and setting me up for life and success.

For example, when I turned ten on my birthday they gave me this huge block party. They shut down a block just for my birthday, then they worked so hard that we got this huge house. They also sign me up for these sport leagues which some my dad coaches some of my teams. They got me into this very good catholic school called OLGK they just do so much

I have two amazing younger brothers that i can teach just like they do but the bottom line is i have a amazing family with all my aunts and uncles grandma and grandpa for all they have done for being funny and teaching me even more stuff give me food amazing presents and so much respect to me but my mom and dad are just two superheroes that guide me the right way trust in god.

For all the examples that I have given are all fun and there are some bad times that I mentioned in the beginning but what i also mentioned is that they help me with that gave me some great friends from now and my old school which I still talk to by the way but i just really should be appreciative of what I have but sometimes im not and that's one of The biggest lessons for me so thanks and tell this to you and your family too.
