

Thank you letter

To my friends
From Jernan

Everything that I do, I always have support. My friends are always there to help me when im struggling. When I am in a predicament, I ask my friends for help and they are always there for me. Even when they have a problem, I will help them. I always wish for the best for my friends because I truly care about them, and if they try to do something bad, I try to help them do right. I love my friends and I wouldn't be the same without them.
