

My name is Parker. I'm a 6th grade student at Boquet Valley Central District. The campus I go to is Mountain View. I like to play football and basketball. I also like to read and draw. Sometimes I like to hang out with my friends, but not much because I like the quiet. Three qualities that I am thankful for are that I am funny, quiet, and patient.

My friends say I'm funny because I make jokes sometimes and I laugh a lot. I'm thankful I have this quality because I can make people happy. I can use this trait in the future because when kids get upset, I can tell them something and it could make them smile. I can do this as an adult at a job too.

My friends think I'm patient. They say I'm patient because I don't always need quick answers. I'm thankful I have this quality because people know they can take their time when they ask a question. It could help me in the future because it could help me listen to my coworkers. I could also let them know that I'm listening. This would make them happy.

My friends say I'm quiet. They say I'm quiet because I don't like to talk much. I also like the quiet. Being quiet could help me in the future because I could focus when I'm working. It could also help me get things done right. When I'm quiet most of the time my friends know I'm focusing really hard.

Those are all the qualities my friends say I have and that I'm proud of. I'm thankful I have these qualities because they prove I'm being my best self. I could improve my patience because if answers take days I get confused. I could also try to be a little less quiet because sometimes people think I'm weird when I'm really quiet. Thank you for reading my essay.
