

Hello, my name is Aiden. I go to Boquet Valley Central School and I learn at the mountain view campus. I am in sixth grade and I am eleven years old. I like finding bugs/animals because it brings me joy. I hope that I find a new species. I also like swimming because the water is so refreshing. Now let's talk about some qualities that I am thankful for.

One quality that I am thankful for is that I am polite. Polite means that you have manners and are nice to other people. The reason that I am proud to be polite is because I like hearing that I am a polite kid. This makes me happy because I don't really hear that a lot. I can probably work on my manners because sometimes I forget to say thank you and please.

The next quality I am thankful for is that I am imaginative. Imaginative means that you have a great imagination. The reason why I am thankful for this trait is because I also don't hear that a lot. Saying this makes me happy and proud.

The last quality that I am thankful for is that I am an active participant. Active participants mean that you like to raise your hand and read/answer questions. The reason why I am thankful for this trait is because I like to participate in class. This makes me happy because it's a quality that I think I am good at.

These are the qualities that I am thankful for. I was talking about three qualities that I am thankful for. The reason I chose those three qualities is because it just stood out to me. These qualities will help me in the future and I can improve on each quality.
