What I am thankful for

Do you like being smart?

It's not easy to be smart but it is helpful, nice, good and makes you the King of the class.

When I am smart I can be creative. When my teacher gives me math, I understand it easily.

We were thinking about a new one and I was not having no questions when but some students were having problems. Since I was smart I could've helped my friends.

IT IS GOOD TO BE SMART!
