

My name is Cain and I go to Boquet Valley Central School. I am from Vermont. My hobbies are playing soccer and football. The qualities I am thankful for are that I am helpful, collaborative, and on task. These traits can help me in the future.

One quality that I am thankful for is being collaborative. I have been collaborative by helping a friend. There was this one time we were hiking up a mountain and my friend was having a hard time so I helped him go up the mountain and he was happy. If you have a job and you do not work well with others, you can lose your job. You could also not get paid until you do a better job at what you are doing.

Another quality I am thankful for is being on task. I am on task by doing my work when I am supposed to and not getting distracted. It's important to focus on just doing your work and not doing anything else while you are doing your work. You have to be on task if you want to keep your job and you need to be on task to succeed.

The last quality I am thankful for is being helpful. I sometimes help people or classmates if they need help. I have helped my classmates and my teacher by not distracting them when they are doing work or helping them pass stuff out to the class so they don't need to do it themselves. This will help me in the future because I can help others at my job.

After all, the things I have said or done to make a good person or student make me who I am. I help people and I do my work when it needs to get done. These qualities will help me in the future because I can use these skills to either earn something or do good in something. Thank you for taking away your free time to read my essay.
