

# Discussing About The Three R's

Reduce  
Reuse  
Recycle

# With Trash

You know Reducing, Recycling, and to Reuse will help bring health to the world.

## Reuse

Reusing is when you make a used product into something useful. I reused it into a vase to hold my flowers. Now now my flowers will stay healthy.

## Reduce

Don't you like sitting in a clean beach, so don't you want to Reduce littering. Don't you like the the sea animals living in the ocean so why don't we Reduce using these things that could harm them.

When you Reduce, you use less products that could harm Earth.

Not only the way you Reduce with the soda bottles can help the environment but could also stay healthy from the Soda inside.

## Recycle

Cans Glass Plastic Paper

When you recycle your giving the products to be broken down or to be remade. For example when you put your cardboard it gets recycled so that it doesn't effect the earth.
