

# What I'm Thankful for

By: Dylan  
Vandenburg

I'm thankful for many things, but I am really thankful for is technology. Here are a few reasons why.

One reason I'm thankful for technology is because you wouldn't be able to text friends or call family, because pretend you have a friend/family in Washington State, you wouldn't just call them up, you would either have to send snail mail [cards] or drive all the way to Washington to see them.

Another reason is because people love to take pictures, am I right? But without cameras/phones, they would have to paint the day when it happened.

My final reason is because everyone loves videos, right? Without technology, you would have to go to the place where a video was made and watch there when they made it or watch it in a play.

These are the reasons why i'm thankful for technology.

# The End
