Thanksgiving Essay

There are so many amazing things to be thankful for in life. One of these things are family. I am thankful to have a family that cares for me and works to support me needs and so many of my wants. Having a Mom, Dad, and brother is extraordinary because whenever you need to be cheered up you always have at least one of them to do that. Second I am thankful to be where I am. No matter if I am talking about my school, my town, or the US I am happy to be here. My school is a nice Catholic school called St. Joseph school and I have learned so much there. My town is so peaceful and everything is a convenient distance away. The US, the free country, is remarkable to be in for everything is equal and it provides to everyone. Lastly I am thankful to be me. From the time when I was born to now, everything that others have done have affected me greatly. From just acquaintances to my Mom and Dad everyone has made a jurassic but good impact on my life. I am sure that anyone reading this has had and will continue to have good impacts on people's lives.
